

Are you a **teacher**,  
a **student**  
or an **academic**  
**institution**?

Are you a **tool developer**  
or a **content provider**?

Are you a **learner**,  
a **trainer** or a **SME**?

# Smart and collaborative learning

The colMOOC project brings agent-based smart technologies in MOOCs to scale up the benefits of triggering learners' interactions.

The project is managed by an international consortium.

Nine partners from 5 countries join forces to develop next generation MOOCs.

- Offer a teacher configurable conversational agent which makes **smart interventions** while peers discuss online. Productive peer dialogue is the basis for learners' constructing shared **deeper understanding**.
- Develop pilot MOOCs available in three well-known worldwide **MOOC platforms**, in domains:
  1. Programming for **Non-Programmers**
  2. Computational **Thinking**
  3. **Educational Technologies** in the Classroom

Explore the impact of the proposed smart tools on all stakeholders and advance a "smart learning technologies" agenda in MOOCs to account for more productive teachers and more satisfied and engaged learners.
